

STATEMENT OF BEN COHEN

CO-FOUNDER BEN & JERRY'S

APRIL 8, 2026

We are witnessing Donald Trump's reckless march toward war after war. He has contempt for truth, justice, and the rule of law.

While millions of Americans struggle to afford healthcare, housing, child care, and the other daily necessities of life, Congress, at President Trump's request, is pouring trillions of dollars into weapons and war. Our out-of-control, bloated Pentagon budget is encumbering future generations with debt they do not deserve and jeopardizing, not strengthening, our national security.

When a president lies us into conflict, puts personal power above public good, and corrupts the institutions meant to protect us, impeachment is the remedy provided by our Constitution. Our founders warned that unchecked power leads to tyranny. They gave us impeachment as the way to stop it.

The American people deserve a president who champions peace, who upholds human rights, and who protects our democracy.

It's time to hold this president responsible—not out of partisanship, but out of patriotism.
